HOSPITAL CARDIOVASCULAR AI IMAGING CENTER

Epicardial & Pericoronary Fat AI Quantification Report

Automated 3D WholeBody SegResNet & CRISP-CT Coronary Inflammation Analysis

Patient ID: 0506
Exam Date: 2026-10-29
Modality: Cardiac CT (CCTA)

ELEVATED RISK

CRISP-CT Vascular Inflammation & Fat Burden: Normal (~26th %ile)

Threshold: PVAT > -70.1 HU indicates active inflammation.

EPICARDIAL ADIPOSE TISSUE (EAT)

Total EAT Volume: 53.3 cm³

Mean Attenuation: -66.3 HU

Chamber Sub-Compartments:

- Left Ventricle (LV): 13.6 cm³
- Right Ventricle (RV): 16.3 cm³
- Left Atrium (LA): 14.4 cm³
- Right Atrium (RA): 9.0 cm³

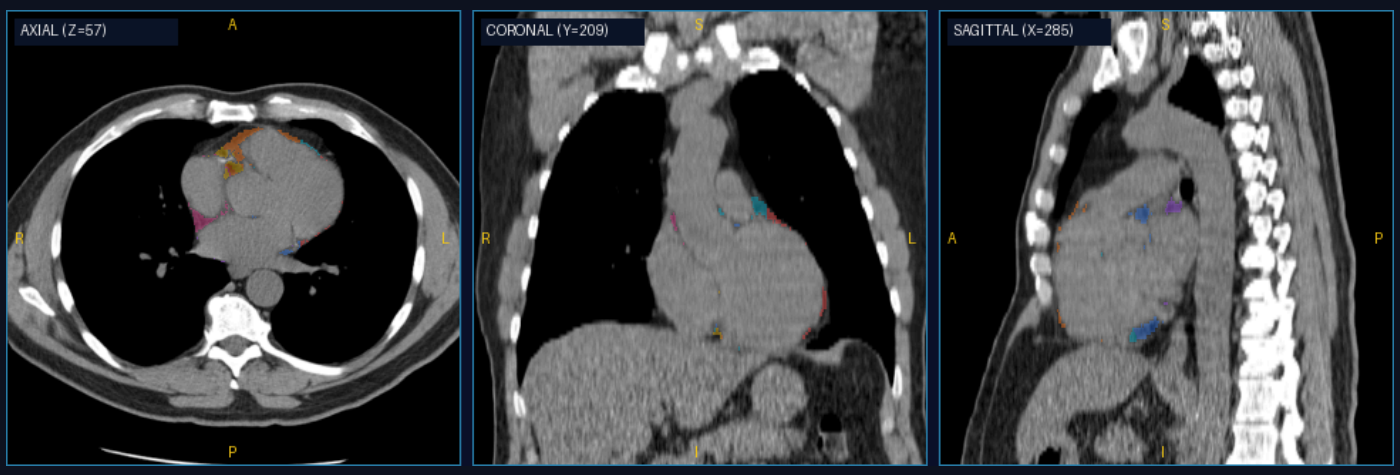

PERICORONARY ADIPOSE TISSUE (PVAT)

LAD PVAT:	5.4 cm³	-67.0 HU	INFLAMED
LCX PVAT:	10.3 cm³	-66.5 HU	INFLAMED
RCA PVAT:	6.4 cm³	-66.7 HU	INFLAMED

Total Pericoronary Fat Volume: 19.6 cm³

3-VIEW ORTHOGONAL MULTI-PLANAR RECONSTRUCTION (MPR) WITH AI OVERLAYS

Axial (Z), Coronal (Y), and Sagittal (X) cardiac planes with 8-compartment adipose masks

STRUCTURED CLINICAL IMPRESSION (READY FOR EHR / POWERSCRIBE):

```
QUANTITATIVE CARDIAC ADIPOSE & INFLAMMATION AI ANALYSIS:
- Overall Biomarker Triage: ELEVATED RISK
- Total Epicardial Fat (EAT) Volume: 53.3 cm3 (Normal burden, ~26th %ile)
- Total EAT Mean Attenuation: -66.3 HU
- Pericoronary Fat Attenuation (CRISP-CT active inflammation threshold: > -70.1 HU):
    * LAD PVAT: -67.0 HU - ELEVATED INFLAMMATION (> -70.1 HU)
    * LCX PVAT: -66.5 HU - ELEVATED INFLAMMATION (> -70.1 HU)
    * RCA PVAT: -66.7 HU - ELEVATED INFLAMMATION (> -70.1 HU)
IMPRESSION: Total Epicardial Adipose Tissue (EAT) volume is 53.3 cm³ (Normal burden, ~26th percentile), with mean attenuation
```
